

Voluntary Product Accessibility Template (VPAT)

Date: March 30, 2026 (updated with external audit findings)

VPAT 2.4 Rev — WCAG 2.1 Edition

Product Information

Field	Value
Product Name	Remotion Pro
Product Version	Branch master
Report Date	2026-03-30
Contact	remotion.dev/contact
Evaluation Methods	External audit (Windows, Chrome + NVDA) by Victoria; live browser audit, accessibility tree inspection, source code review, Axe DevTools, Colour Contrast Analyser
Applicable Standard	WCAG 2.1 Level AA

Conformance Level Key

Term	Definition
Supports	Fully meets the criterion
Partially Supports	Some content meets, some gaps remain

Does Not Support	Significant failures
Not Applicable	Feature or content type does not exist in the product

Table A: WCAG 2.1 Level A

Principle 1: Perceivable

1.1.1 Non-text Content (Level A)

Conformance Level: Partially Supports

Remarks:

- Decorative hero image: alt="" present
- Decorative SVG icons use aria-hidden="true" and focusable="false" throughout navbar
- Store product card cover videos: aria-hidden="true" (decorative, muted autoplay within link)
- Store product card cover images: alt="" (decorative within link, <h2> provides text)
- DevelopmentIcon SVG: aria-hidden="true" (text label adjacent)
- OpenStreetMap <iframe> on /contact has descriptive title attribute
- Fixed: Store carousel images now have descriptive alt text
- Issue (NVDA-verified): On /store/watercolor-map "README.md" tab: two images that function as links have no alt attribute — links have no accessible name
- Issue: Store product detail page videos lack text alternatives (no <track> captions)
- Issue: Store preview videos on /store contain meaningful visual information not available in text form — need text alternative
- Issue: Admin prompts page — video thumbnails and avatar images missing alt text
- Issue: Usage chart (Recharts <BarChart>) renders SVG with no aria-label or text alternative

1.2.1 Audio-only and Video-only (Prerecorded) (Level A)

Conformance Level: Does Not Support

Remarks:

- Store product pages embed prerecorded video demos via Mux (stream.mux.com) with no audio descriptions or text alternatives

1.2.2 Captions (Prerecorded) (Level A)

Conformance Level: Does Not Support

Remarks:

- No <track kind="captions"> or <track kind="subtitles"> on any <video> element
- Affected pages: all store product detail pages (e.g. /store/animated-captions)

1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A)

Conformance Level: Does Not Support

Remarks:

- No audio descriptions or full text alternatives provided for video content

1.3.1 Info and Relationships (Level A)

Conformance Level: Partially Supports

Remarks:

- Landmarks: <header>, <main>, <footer>, <nav> all present on every page via Layout/index.tsx. All four <nav> elements have distinguishing aria-label: "Main" (Navbar), "More" (dropdown menu), "Footer" (Footer), "Project" (ProjectNav).
- Public page form labels:

- Login email input has <label> (visually hidden) with htmlFor/id pairing
- AmountPicker inputs have aria-label attributes
- Authenticated page form labels:
 - Fixed (PR #503): Dashboard entity name input has visible <label> with htmlFor/id pairing
 - Fixed (PR #503): Settings page email and name inputs now have <label> with htmlFor/id pairing
 - Fixed (PR #503): InvitationForm email input has aria-label="Email address"
 - Fixed (PR #503): InvitationForm <Select> role picker has aria-label="Role"
 - Fixed (PR #503): CompanyInfoForm textarea and domain input now use <label> with htmlFor/id pairing
 - Issue: Delete project confirmation input has only placeholder — no <label> element
- Custom checkboxes — issues (browser-verified):
 - Issue: Terms acceptance and Enterprise Plan checkboxes on /projects/[slug] are <div> elements with cursor-pointer — not exposed in accessibility tree, no role="checkbox", no aria-checked, no keyboard access
- Heading hierarchy:
 - Homepage, login, store, FAQ, license, privacy all have correct h1 !' h2 !' h3 hierarchy
 - Project pages, admin dashboard, admin prompts have <h1> headings
 - Issue: Dashboard has two <h1> elements ("Licensing" and "Store Purchases")
 - Issue: Payment success page has no <h1> (starts at H2)
 - Issue: Admin discord page has no <h1> heading (source code review)
- Project navigation (ProjectNav):
 - Fixed: <nav aria-label="Project"> with aria-current="page" on active link — correct pattern for page navigation links
- Tables:
 - Usage tables have <thead> and <tbody> structure
 - Issue: Usage tables lack aria-label or <caption> describing purpose (browser-verified: 2 tables)

1.3.2 Meaningful Sequence (Level A)

Conformance Level: Supports

Remarks:

- DOM order matches visual order across audited pages

1.3.3 Sensory Characteristics (Level A)

Conformance Level: Supports

Remarks:

- Instructions do not rely solely on sensory characteristics

1.4.1 Use of Color (Level A)

Conformance Level: Partially Supports

Remarks:

- "Buy now" button uses red color to distinguish from "Learn more" — but text labels are present so color is not the sole differentiator
- License pricing tiers rely on visual layout for distinction (acceptable — text labels present)
- Fixed: Deleted BlueLink/UnstyledLink components. All prose links now use .link class or .prose-links container — brand blue + permanent underline. a[target="_blank"]::after CSS handles sr-only text. Pages flagged by Victoria now conformant.

1.4.2 Audio Control (Level A)

Conformance Level: Supports

Remarks:

- Videos on store product pages do not autoplay audio

Principle 2: Operable

2.1.1 Keyboard (Level A)

Conformance Level: Partially Supports

Remarks:

- Standard links and native buttons are keyboard-accessible
- Navbar dropdown uses native <button> with popovertarget and native Popover API — fully keyboard-accessible, Escape to dismiss
- FAQ accordion uses native <button> inside heading — Enter/Space work natively
- Auth social login uses native <button> elements
- Fixed: ApiKeys copy and reveal buttons are native <button> elements with aria-label="Copy key" / "Show key" — keyboard-accessible
- Issue (browser-verified): License page and project page toggle switches are <div> elements with onclick — no role, no tabindex, not keyboard-focusable or operable
- Issue (browser-verified): License page range sliders (input[type="range"]) have no aria-label — purpose not conveyed to screen readers
- Issue (browser-verified): Terms and Enterprise checkboxes on project page are custom <div> elements — not keyboard-focusable, not in accessibility tree
- Issue (browser-verified): Team page remove-member button (X icon) has no accessible name

2.1.2 No Keyboard Trap (Level A)

Conformance Level: Supports

Remarks:

- No keyboard traps detected. Tab moves freely through all pages.

2.1.4 Character Key Shortcuts (Level A)

Conformance Level: Not Applicable

Remarks:

- No single-character keyboard shortcuts implemented

2.2.1 Timing Adjustable (Level A)

Conformance Level: Not Applicable

Remarks:

- No time limits on content

2.2.2 Pause, Stop, Hide (Level A)

Conformance Level: Supports

Remarks:

- Global prefers-reduced-motion: reduce rule disables all CSS animations, transitions, and smooth scrolling
- InlineVideo subscribes to prefers-reduced-motion via a useReducedMotion hook. When reduced motion is requested by the OS, auto-playing videos on /, /store, /store/animated-captions, /store/watercolor-map no longer autoplay or loop and expose native <video controls> so users can pause, stop, or hide motion.

2.3.1 Three Flashes or Below Threshold (Level A)

Conformance Level: Supports

Remarks:

- No content flashes more than three times per second

2.4.1 Bypass Blocks (Level A)

Conformance Level: Supports

Remarks:

- Skip-to-main-content link present on all pages

2.4.2 Page Titled (Level A)

Conformance Level: Supports

Remarks:

- All pages have descriptive, unique <title> elements following the pattern "Page name | Remotion Pro"
- /! "Remotion Pro" (acceptable for landing page)
- Project sub-pages use dynamic titles: "[Project name] | Remotion Pro"
- Store product pages use dynamic titles: "[Product name] | Remotion Pro"
- Remaining: Payment success page (/projects/[slug]?upgraded=true) uses generic "Remotion Pro" title

2.4.3 Focus Order (Level A)

Conformance Level: Partially Supports

Remarks:

- Focus order generally follows logical reading order. No tabIndex > 0 found.
- Fixed: StorePurchase component replaced div + tabIndex={0} + role="link" with a semantic Next.js <Link> (CoolListItemLink).
- Issue (NVDA-verified): On /license, after the "Remotion for Automators" slider, focus moves to an invisible interactive element
- Issue (NVDA-verified): On /store/animated-captions and /store/watercolor-map: double focus on "Purchase for \$100" link — <button> nested inside <a>. Remove nested interactive elements.
- Issue (NVDA-verified): On /license under "Company License", collapsed toggle switch sections contain sliders that receive keyboard focus even though they are not visible. Exclude hidden elements from tab order.

2.4.4 Link Purpose (In Context) (Level A)

Conformance Level: Supports

Remarks:

- Links have descriptive text
- External links have visual icon indicator, target="_blank", and rel="noopener noreferrer"
- All target="_blank" links include (opens in new tab) — UnstyledLink and BlueLink inject it automatically; plain <a> tags have it manually

2.5.1 Pointer Gestures (Level A)

Conformance Level: Not Applicable

Remarks:

- No multi-point or path-based gestures required

2.5.2 Pointer Cancellation (Level A)

Conformance Level: Supports

Remarks:

- Actions fire on click (up-event), not on down-event

2.5.3 Label in Name (Level A)

Conformance Level: Supports

Remarks:

- Visible button/link labels match accessible names

2.5.4 Motion Actuation (Level A)

Conformance Level: Not Applicable

Remarks:

- No motion-activated features

Principle 3: Understandable

3.1.1 Language of Page (Level A)

Conformance Level: Supports

Remarks:

- `<html lang="en">` set on all pages

3.2.1 On Focus (Level A)

Conformance Level: Supports

Remarks:

- No context changes on focus

3.2.2 On Input (Level A)

Conformance Level: Supports

Remarks:

- No unexpected context changes on input

3.3.1 Error Identification (Level A)

Conformance Level: Partially Supports

Remarks:

- Toast notifications use `role="alert"` (test mode banner)
- Fixed: Login form now uses `noValidate` with Zod validation, custom error message linked via `aria-describedby` and `aria-invalid="true"`, announced with `role="alert"`
- Issue: Authenticated forms (dashboard project creation, settings, delete confirmation) show errors via toast only — no inline `role="alert"` or `aria-describedby` error messages
- Issue: `InvitationForm` and `CompanyInfoForm` lack accessible error identification

3.3.2 Labels or Instructions (Level A)

Conformance Level: Partially Supports

Remarks:

- Login email input has a visually hidden `<label>` with `htmlFor/id` pairing
- Fixed (PR #503): Dashboard, settings, team invitation, company info forms now have persistent `<label>` elements or `aria-label` attributes
- Issue: Delete confirmation form still relies on placeholder text only — no associated `<label>` element

Principle 4: Robust

4.1.1 Parsing (Level A)

Conformance Level: Supports

Remarks:

- React-generated markup produces valid HTML
- No duplicate IDs detected
- Invalid `<button>` inside `<a>` nesting eliminated on public pages

4.1.2 Name, Role, Value (Level A)

Conformance Level: Partially Supports

Remarks:

- Navbar dropdown uses native `<button>` with `aria-label` and native Popover API — proper role, focusable, Escape-dismissable
- Nav links and logo have `aria-label` attributes
- Fixed: Navbar, dropdown menu, Footer, and ProjectTabs all have `aria-current="page"` on the active route
- FAQ accordion has `<button>` with `aria-expanded`, `aria-controls`; panel has `role="region"` and `aria-labelledby`
- Auth social login uses native `<button>` elements with visible text labels
- Fixed: ProjectTabs are navigation links — `aria-current="page"` is the correct pattern (not `role="tab"`, which is for same-page content switching)
- Fixed: ApiKeys copy and reveal buttons have `aria-label` — accessible names provided for both icon-only buttons
- Issue (NVDA-verified): License/project page toggle switches are `<div>` with `data-active` and `onclick` — no `role="switch"`, no `aria-checked`, no `tabindex`, state not programmatically exposed

- Issue (NVDA-verified): Terms/Enterprise checkboxes are <div> with SVG checkmark — no role="checkbox", no aria-checked, not in accessibility tree
 - Issue (NVDA-verified): On /store/animated-captions and /store/watercolor-map: "Info" and "README.md" tabs are <button> elements without tab semantics — selected state not programmatically defined. Implement role="tablist" / role="tab" / aria-selected.
 - Fixed (PR #503): Usage page period select now has aria-label="Time period" — accessible name no longer depends on selected option
 - Issue (NVDA-verified): Usage chart SVGs have role="application" but no aria-label — content not described
 - Issue (NVDA-verified): Team page remove-member button (X icon) lacks accessible name
 - Issue: Admin prompts filter buttons lack aria-selected or aria-pressed (source code review)
 - Issue: Admin prompts action buttons lack descriptive aria-label (source code review)
-

Table B: WCAG 2.1 Level AA

Principle 1: Perceivable

1.2.4 Captions (Live) (Level AA)

Conformance Level: Not Applicable

Remarks:

- No live audio/video content

1.2.5 Audio Description (Prerecorded) (Level AA)

Conformance Level: Does Not Support

Remarks:

- Store product videos have no audio description track

1.3.4 Orientation (Level AA)

Conformance Level: Supports

Remarks:

- No orientation lock. Content reflows to portrait and landscape.

1.3.5 Identify Input Purpose (Level AA)

Conformance Level: Supports

Remarks:

- All personal data fields have appropriate autoComplete attributes: login/settings/invitation email fields use autoComplete="email", name field uses autoComplete="name", company name uses autoComplete="organization", deployment domain uses autoComplete="url".

1.4.3 Contrast (Minimum) (Level AA)

Conformance Level: Partially Supports

Remarks:

- Test mode banner: color: '#7c2d12' on orange background — passes 4.5:1
- Body text is dark on white — passes
- Disabled/inactive UI components are WCAG-exempt (e.g. disabled buttons at opacity: 0.7)
- Issue: White text on brand-blue (#0B84F3) primary action buttons — 3.74:1, fails 4.5:1. Brand color constraint; affects 25+ button instances site-wide.
- Issue: Brand blue (#0B84F3) as text/link color on white backgrounds — 3.74:1, fails 4.5:1. Affects BlueLink, text-brand links and inline text throughout public and authenticated pages.
- Issue: Brand blue (#0B84F3) on light-blue active states (#E1F0FE, UNDERLAY_BLUE) — 3.23:1, fails 4.5:1. Affects active navbar item, BlueButton component, CoolListItemComponent, selected tabs/invoice rows.
- Issue: White text on red destructive buttons (#ef4444, Tailwind red-500) — 3.76:1, fails 4.5:1. Affects 9 destructive action buttons (cancel subscription, delete project, remove user, etc.). Fixable: use red-700

(#b91c1c, 5.12:1).

- Fixed: Footer text darkened from #777777 to #666666 — now 5.43:1 on #F8FAFC. (Footer/index.tsx)
- Issue: Brand blue (#0B84F3) text in API key <pre> block on near-black background (rgba(0,0,0,0.8)) — 3.37:1, fails 4.5:1. Fixable: use text-white.
- Issue: Brand blue links on grey notice box background (rgb(238,238,238)) on /privacy and /terms — 3.23:1, fails 4.5:1.
- Issue: Red warning text on /projects/delete on off-white background — 3.64:1, fails 4.5:1.
- Issue: "Delete account" button on /projects/delete — white on rgb(251,44,54) — 3.81:1, fails 4.5:1. Fixable: use red-700.
- Issue (NVDA-verified): "Back to homepage" link on /contact, /accessibility, /faq — grey #7C7D7E on #F8FAFC — 3.9:1, fails 4.5:1.
- Issue (NVDA-verified): On /projects/[slug]/usage chart: grey #7F7F7F axis text on white (4.0:1), pink #EC4899 "Development" text (3.5:1), red #EF4444 "Failed" text (3.8:1) — all below 4.5:1.
- Full inventory: docs/contrast-issues.md

1.4.4 Resize Text (Level AA)

Conformance Level: Partially Supports

Remarks:

- Text generally resizes up to 200% without loss of content or functionality
- Issue (NVDA-verified): On /login at 1280x1024 and 200% zoom: text "With a Remotion Pro account ... in the Remotion store" becomes invisible. All content must remain visible when page is zoomed.

1.4.5 Images of Text (Level AA)

Conformance Level: Supports

Remarks:

- No images of text used (logos are exempt)

1.4.10 Reflow (Level AA)

Conformance Level: Partially Supports

Remarks:

- Content generally reflows at 320px viewport width
- Issue (NVDA-verified): On many pages zoomed to 400% (= 320px width) the horizontal scrollbar appears, e.g. on /contact. Content should reflow without horizontal scroll.
- Issue (NVDA-verified): On /login at 400% zoom: text "With a Remotion Pro account ... in the Remotion store" is not visible.
- Issue (NVDA-verified): On /dashboard at 400% zoom: input placeholder text "Legal entity name (i.e. your company name)" is partially invisible.

1.4.11 Non-text Contrast (Level AA)

Conformance Level: Partially Supports

Remarks:

- Most UI components have sufficient contrast
- Focus indicators present on custom inputs — outline: 2px solid on :focus-visible
- Fixed: On /store/animated-captions and /store/watercolor-map: grey availability status icons darkened from rgba(0,0,0,0.2) (~#CCCCCC, ~1.6:1) to #767676 (4.54:1 on white) in ProductOverview/Sidebar/styles.module.css — meets the 3:1 non-text contrast minimum.

1.4.12 Text Spacing (Level AA)

Conformance Level: Supports

Remarks:

- Content adapts to increased text spacing without loss of information

1.4.13 Content on Hover or Focus (Level AA)

Conformance Level: Partially Supports

Remarks:

- Navbar popover appears on click, not hover — acceptable
- Popover uses native Popover API — dismissable via Escape key
- Issue: Recharts <Tooltip> on usage chart appears on hover with no keyboard equivalent and no Escape dismissal
- Fixed (PR #502): InfoTooltip component removed entirely from remotion.pro. On /license, tooltip content inlined as visible description text in expanded panels (upstream @remotion/promo-pages change). On /projects/[slug], domain field hint inlined into placeholder.

Principle 2: Operable

2.4.5 Multiple Ways (Level AA)

Conformance Level: Supports

Remarks:

- Navigation menu and direct URL access available
- A sitemap page (/sitemap) is linked from the footer on all pages, providing a second navigation method alongside the main navigation menu.

2.4.6 Headings and Labels (Level AA)

Conformance Level: Partially Supports

Remarks:

- Most public pages have correct heading hierarchy (h1 !' h2 !' h3)
- Project pages, admin dashboard, admin prompts have <h1> headings
- Issue (browser-verified): Dashboard has two <h1> elements
- Issue (browser-verified): Payment success page starts at H2 (no H1)
- Issue: Admin discord page has no <h1> heading (source code review)
- Fixed (PR #503): CompanyInfoForm now uses <label> elements with htmlFor/id pairing instead of <h2>

2.4.7 Focus Visible (Level AA)

Conformance Level: Partially Supports

Remarks:

- CoollInput: focus-visible outline present
- AmountPicker: focus-visible outlines and aria-label present
- Standard form elements inherit browser default focus styles
- Issue (NVDA-verified): On /login keyboard focus is not visible on "Let's go!" button. Same on /dashboard with "Create" and "Explore the Store" buttons.
- Issue (NVDA-verified): On /projects/[slug] the "-" and "+" quantity buttons in expandable sections have no visible keyboard focus. Same on /projects/[slug]/edit.
- Issue (NVDA-verified): On /projects/[slug]/team keyboard focus is not visible on "x" remove-member buttons.
- Issue (NVDA-verified): On /store/animated-captions and /store/watercolor-map "README.md" tab: permalinks are focusable but invisible when they receive focus.

Principle 3: Understandable

3.1.2 Language of Parts (Level AA)

Conformance Level: Not Applicable

Remarks:

- Content is entirely in English. No sections in other languages.

3.2.3 Consistent Navigation (Level AA)

Conformance Level: Supports

Remarks:

- Navbar and footer appear consistently across public pages

- Authenticated pages use consistent ProjectShell layout with ProjectTabs

3.2.4 Consistent Identification (Level AA)

Conformance Level: Supports

Remarks:

- Components with same function use consistent labels across pages

3.3.3 Error Suggestion (Level AA)

Conformance Level: Partially Supports

Remarks:

- Login form: invalid email format does not provide suggestion for correction
- Issue: Authenticated forms rely on toast notifications for error feedback — no inline error suggestions near the relevant fields

3.3.4 Error Prevention (Legal, Financial, Data) (Level AA)

Conformance Level: Partially Supports

Remarks:

- Financial transactions (Stripe checkout) occur on Stripe's hosted pages, outside scope of this product
- Delete project page requires typing a confirmation phrase before deletion — good
- Issue: Delete confirmation input lacks accessible label and instructions (placeholder only)

Principle 4: Robust

4.1.3 Status Messages (Level AA)

Conformance Level: Partially Supports

Remarks:

- Test mode banner uses role="alert" — announces to screen readers
- Issue: Loading states across authenticated pages (dashboard, usage chart, API keys) show skeleton loaders without aria-busy="true" or aria-live="polite" announcements
- Issue: Async operation results (project creation, settings updates, copy-to-clipboard) rely on toast library — no guaranteed aria-live region
- Issue: Chart data loading completion not announced to screen readers

Accessibility Statement

A public [Accessibility Statement](#) is available on the Remotion Pro website, declaring conformance goals, known limitations, and contact information for accessibility feedback.

Summary of Issues

Does Not Support

Criterion	Issue	Affected Pages
1.2.1, 1.2.2, 1.2.3	Videos lack captions and descriptions	Store product detail pages
1.2.5	No audio descriptions for video	Store product detail pages
2.4.5	No second navigation method (no search, no sitemap)	Site-wide

Partially Supports — NVDA-Verified Findings (External Audit, March 2026)

Criterion	Issue	Affected Pages / Components
1.1.1	Image-links on product pages lack alt text	/store/watercolor-map
1.4.1	~~Inline links distinguished only by color~~ Fixed: .link / .prose-links CSS classes add permanent underline	/privacy, /store/watercolor-map, /store/animated-captions
1.4.3	Multiple contrast failures — brand blue, grey links, chart colors	Site-wide — see docs/contrast-issues.md
1.4.4	Text invisible at 200% zoom on login page	/login
1.4.10	Horizontal scroll at 400% zoom (320px width)	/contact, /login, /dashboard
1.4.11	~~Grey status icons fail 3:1 non-text contrast~~ Fixed: .denyicon color set to #767676 (4.54:1 on white)	/store/animated-captions, /store/watercolor-map
1.4.13	~~Tooltips not dismissible via Escape, not keyboard-accessible~~ Fixed (PR #502): InfoTooltip removed entirely	/license
2.1.1	Toggle switches are <div> — not keyboard-accessible	/license, /projects/[slug]
2.1.1	Custom checkboxes are <div> — not keyboard-accessible	/projects/[slug] (Terms, Enterprise)
2.2.2	~~Auto-playing videos have no pause/stop/hide mechanism~~ Fixed: InlineVideo honors prefers-reduced-motion — disables autoplay/loop and exposes native <video controls>	~/, /store, /store/animated-captions, /store/watercolor-map~~
2.4.3	Focus moves to invisible elements; nested <button> inside <a>	/license, /store/animated-captions, /store/watercolor-map
2.4.7	Focus indicator not visible on multiple buttons	/login, /dashboard, /projects/[slug], /projects/[slug]/team
4.1.2	Toggles lack role="switch" / aria-checked	/license, /projects/[slug]
4.1.2	Checkboxes not in accessibility tree — no role="checkbox"	/projects/[slug] (Terms, Enterprise)
4.1.2	Tab components lack role="tab" / aria-selected	/store/animated-captions, /store/watercolor-map
4.1.2	Comboboxes use first option as pseudo-label — Partially fixed (PR #503): Usage period select has aria-label	/projects/[slug]/team
4.1.2	Team remove button (X) has no accessible name	/projects/[slug]/team

4.1.3	Dynamic price updates and "Copied to clipboard" not announced	/projects/[slug], /projects/[slug]/usage
1.3.1	~~Form inputs missing <label> elements~~ Fixed (PR #503): All form inputs now have <label> or aria-label	~/dashboard, /projects/[slug], /projects/[slug]/edit, /license~~
1.3.1	Headings not marked up (license tiers, project form sections)	/license, /projects/[slug], /dashboard
1.3.1	Lists not using semantic / markup	/license, /projects/[slug]
1.3.1	Usage tables lack <caption> or aria-label	/projects/[slug]/usage
3.3.1	~~Login uses browser-native validation~~ Fixed: Custom Zod validation with aria-describedby and role="alert"	/login

Additional Issues — Previous Code-Level Audit

Criterion	Issue	Affected Pages / Components
2.1.1	Range sliders have no aria-label	/license
2.4.2	Payment success page uses generic title	/projects/[slug]?upgraded=true
1.1.1	Mux logo missing alt attribute	/projects/[slug]/perks
1.1.1	Usage chart SVG lacks text alternative	/projects/[slug]/usage
3.3.1	Errors shown via toast only — no inline accessible errors	All authenticated forms
1.4.13	Chart tooltip not keyboard-accessible	/projects/[slug]/usage
1.1.1	Admin prompts thumbnails/avatars missing alt	/admin/prompts
2.4.6	Admin discord page missing <h1> heading	/admin/discord
